

Willow Springs Wash and Tributaries Floodplain and Floodway Delineation Studies

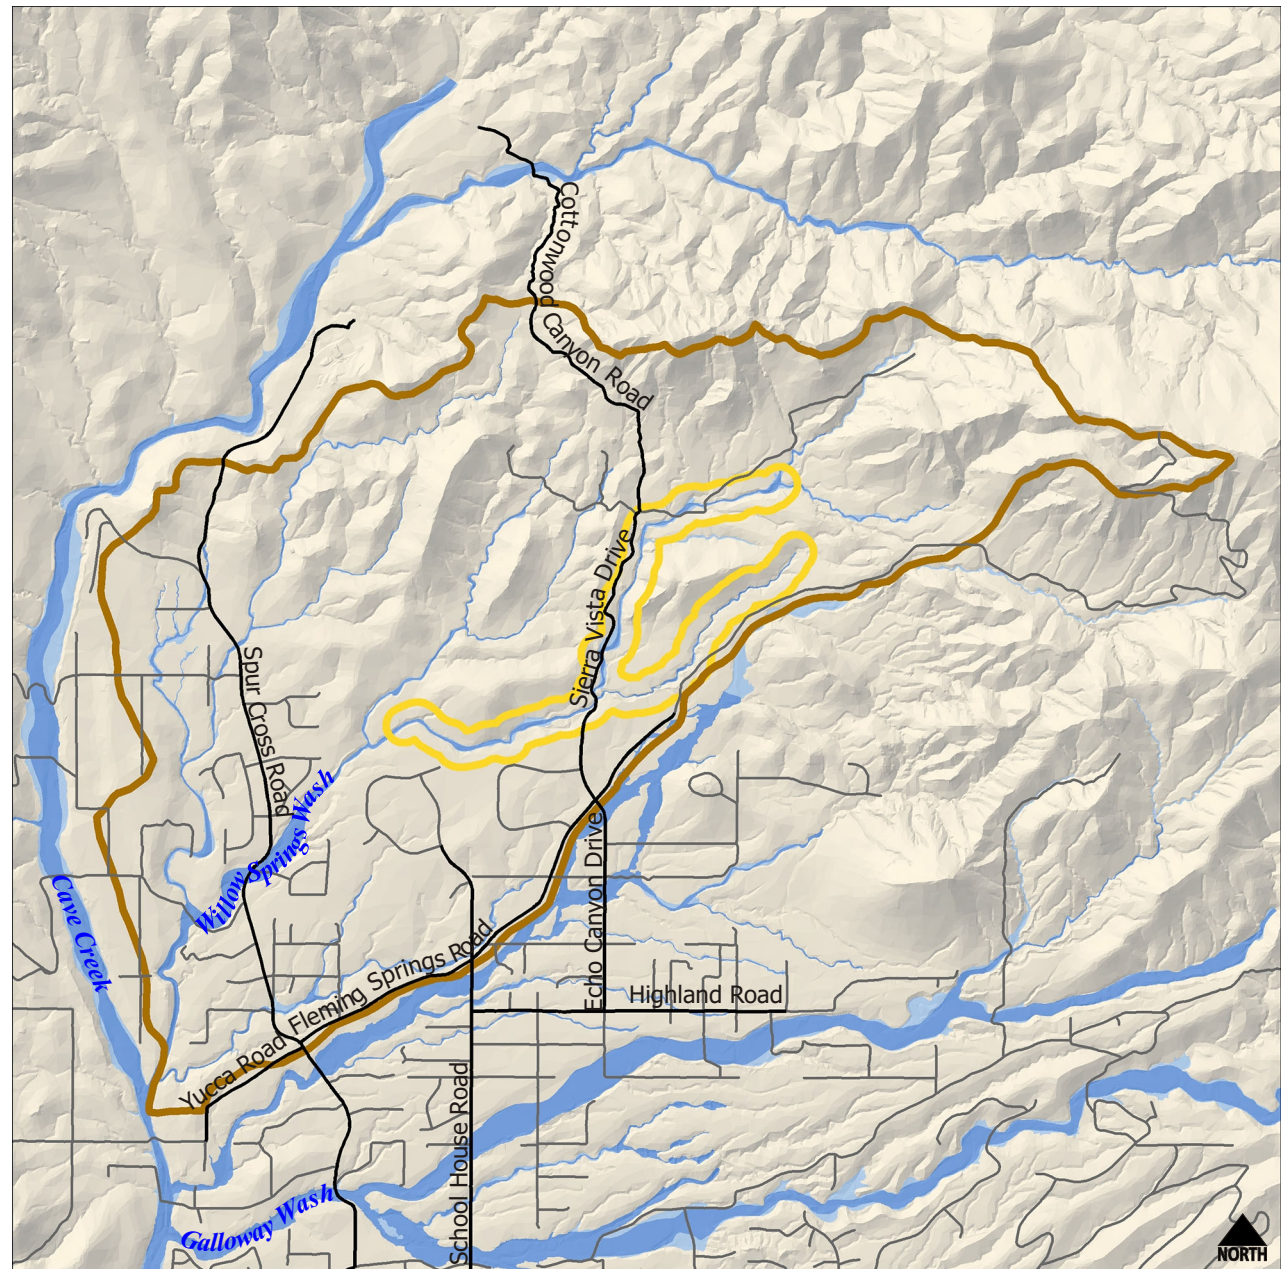

Introduction

For more than 50 years, the Flood Control District of Maricopa County (District) has provided regional flood control services to county residents to protect lives and property from the hazards of flooding. The District has contracted with the consulting firm, Michael Baker Jr., Inc., to provide detailed re-delineations of floodplains and floodways for Willow Springs Wash and its tributaries.

Project Overview

The overall study area lies within the boundaries of the Town of Cave Creek and extends into unincorporated Maricopa County. You have received this brochure because property ownership records show you have a parcel or parcels located in or near an existing or proposed floodplain in Phase II of the study area.

The study and resulting floodplain maps will be used for floodplain management purposes and will be submitted to the Federal Emergency Management Agency (FEMA) for flood insurance information and revisions of Flood Insurance Rate Maps. This study should be available for public review in May 2013.

Map not to scale.

Next Steps

This brochure is intended to inform you of the start of this study, and to advise you that it may be necessary for personnel to briefly enter or cross your property to perform surveying and reconnaissance activities in support of the study. This activity should not result in any inconvenience to you or damage to your property. If you have any objection to the entry onto your property, please notify Richard Harris at the contact information listed below. Otherwise it will be assumed that you consent to the entry onto your property.

The parcel number(s) for your property within the study area is located above your name on the mailing label on this brochure. If you wish to receive floodplain information for your parcel(s), please contact Richard Harris.
